

Centre for Technical and Engineering Leadership

When engineers are promoted from within, they have the technical knowledge to excel, but do they have the leadership skills they need to be successful?
Start your path to becoming an engineering leader. Join our two-day leadership program designed specifically for engineering professionals.

Managing Change

Change is a constant: technologies, processes, people, idea, and method often change affecting the way we perform and live our lives.

Leaders navigate change smoothly and with acceptance.

Understanding Personalities

Each of us enters this world with an innate personality that determines how we interact, engage, energize, think, and navigate our surroundings. Understanding who we are and being able to recognize traits in those around us can help make our teams and relationships more effective.

Leaders embrace differences.

Writing Reports

Reports are a major deliverable but many technical professionals are not confident in their writing skills. Even with advanced communication tools, the report is still the main way firms distribute their ideas and findings.

Leaders recognize the power of well-written documents.

Thinking Ethically

Good decisions are ethical decisions and require logic. Unlike a legal course, we take a philosophical perspective at how/why individuals act, react, and decide what to do.

Leaders are defined by their actions.

Winnipeg Session

Canad Inns Fort Garry
1824 Pembina Hwy, Winnipeg, MB R3T 2G2

December 12-13, 2016

8:00 a.m. - 5:00 p.m.

\$1200 includes GST

Includes breakfast, lunch and all materials.

Attend all 4 courses for 16 hours of training.
